

ANANTCONSULTANTS  
& ENGINEERS

“ Providing  
comprehensive  
environmental and  
engineering services  
since 1984 ”

# Engineering with a difference

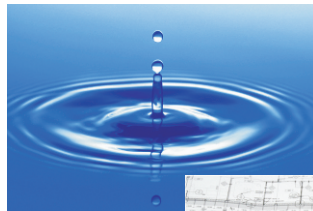

Since 1984, Anant Consultants and Engineers has been serving the needs of clients with a wealth of knowledge, experience, capabilities and project management expertise. We see creative solutions where others see problems. We provide the innovations that enable complex pollution related problems to have cost effective solutions. We especially have extensive experience in wastewater management.

“ Projects range from residential & commercial development to infrastructure development of services.”

Growth management, Environmental regulation, Economic constraints - are some of the issues affecting the planning. We specialize in developing creative concepts that effectively address not only your environmental constraints at site but also the fiscal constraints on the project. Our planning experience includes meeting Statutory and Municipal standards and industrial applications. We also assist project development plant managers and others with site specific environmental needs.
